

Summary of Mission 2

MISSION 2

How to master Cloud Computing and feel confident to go to market in positions that can increase your salary;

THE JOURNEY OF THE IRRESISTIBLE IT PROFESSIONAL

IT Professional
(DBA, Dev, etc).

IT Professional
with Cloud Knowledge.

Opportunities
run after you
not you after them.

This is the Golden Time for IT professionals who master Cloud Computing. Cloud Computing knowledge can completely change the direction of your career and your life. Companies are looking for professionals who can make the shift from the traditional environment to the Cloud.

SUCCESS CASE – MULTICLOUD BOOTCAMP

DJ

Sr. Network Engineer WITHOUT any Cloud experience

RESULT:

In less than 30 days after joining the MultiCloud Bootcamp, implementing hands-on projects, and applying the Irresistible Professional Theory (IPT) on his career, he got an offer by US Based Company for a Google Cloud Engineer full-time position and got a 100% hike on his base salary.

Why is the Cloud Computing market growing exponentially and ***the number of professionals with the knowledge to fill these positions is not proportional?***

Why while some professionals are doing the same repetitive role, others are in positions in the **Cloud Market and are increasing their salaries?**

Two types of IT Professionals

Those who are on the road of Failure and those who are being chased by the market

TYPE 1

ON THE ROAD OF FAILURE

TYPE 2

CHASED BY THE MARKET

STAGES OF A PROFESSIONAL ON THE ROAD TO FAILURE:

- **STAGE 1**

The Cave;

- **STAGE 2**

Loss of Relevance;

- **STAGE 3**

Layed-off.

Stage 1: The Cave

When you don't keep up to date with the skills sets needed by the market. When you don't know what the skill sets the market is looking for.

When you have been an expert for years in a technology that is becoming obsolete

Stage 2: Loss of Relevance

You're starting loosing internal (in your company) and external (job market) relevance. You are not valued in the workspace because of your outdated skills

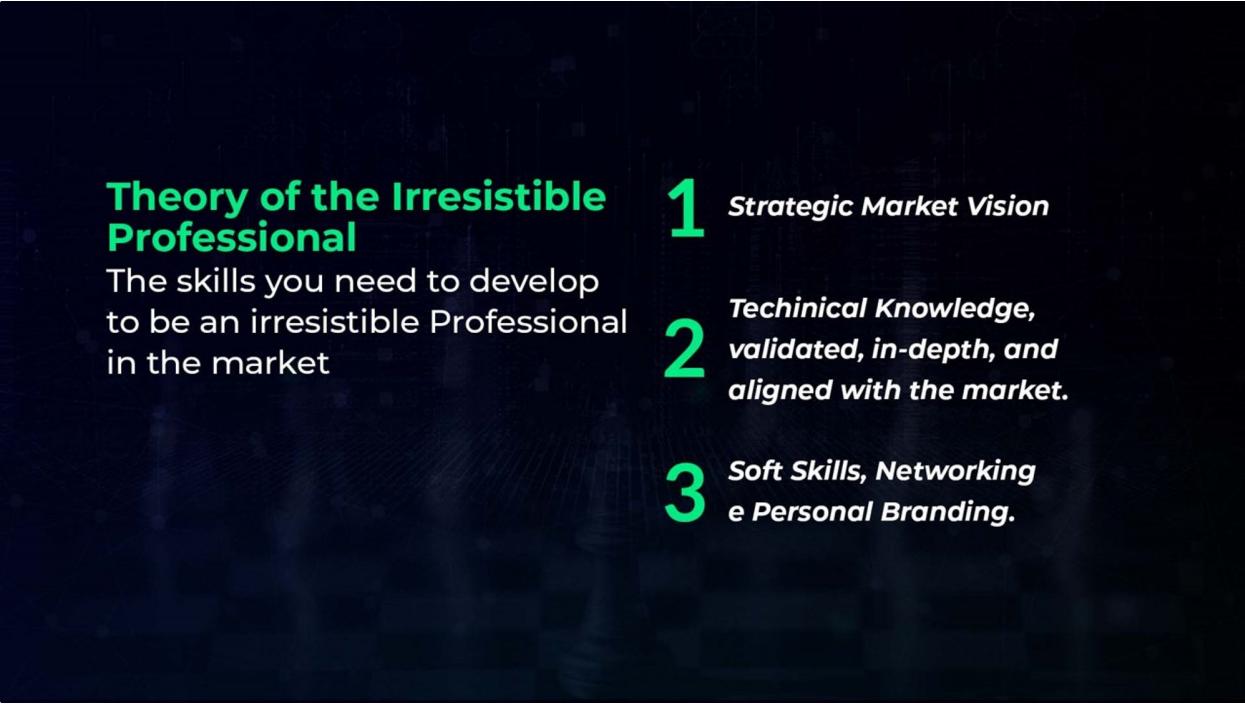

Stage 3: Layed-off

This is the most critical scenario and unfortunately, many professionals only wake up when they reach this stage. When you are in this phase you need a lot of determination. Here your concern is not only to be relevant in the market anymore but to get back to the market. Now you have two problems, and to get back to the market is much more difficult.

Are you on the **Road to Failure** and want to become an **Irresistible Professional** in the Market?

If you have identified that you are on the road to failure and want to get out of this place, I want to introduce you to the skills you must develop. And if you want to be a confident professional to perform in the marketplace that can increase their salary from 50% to 300%.

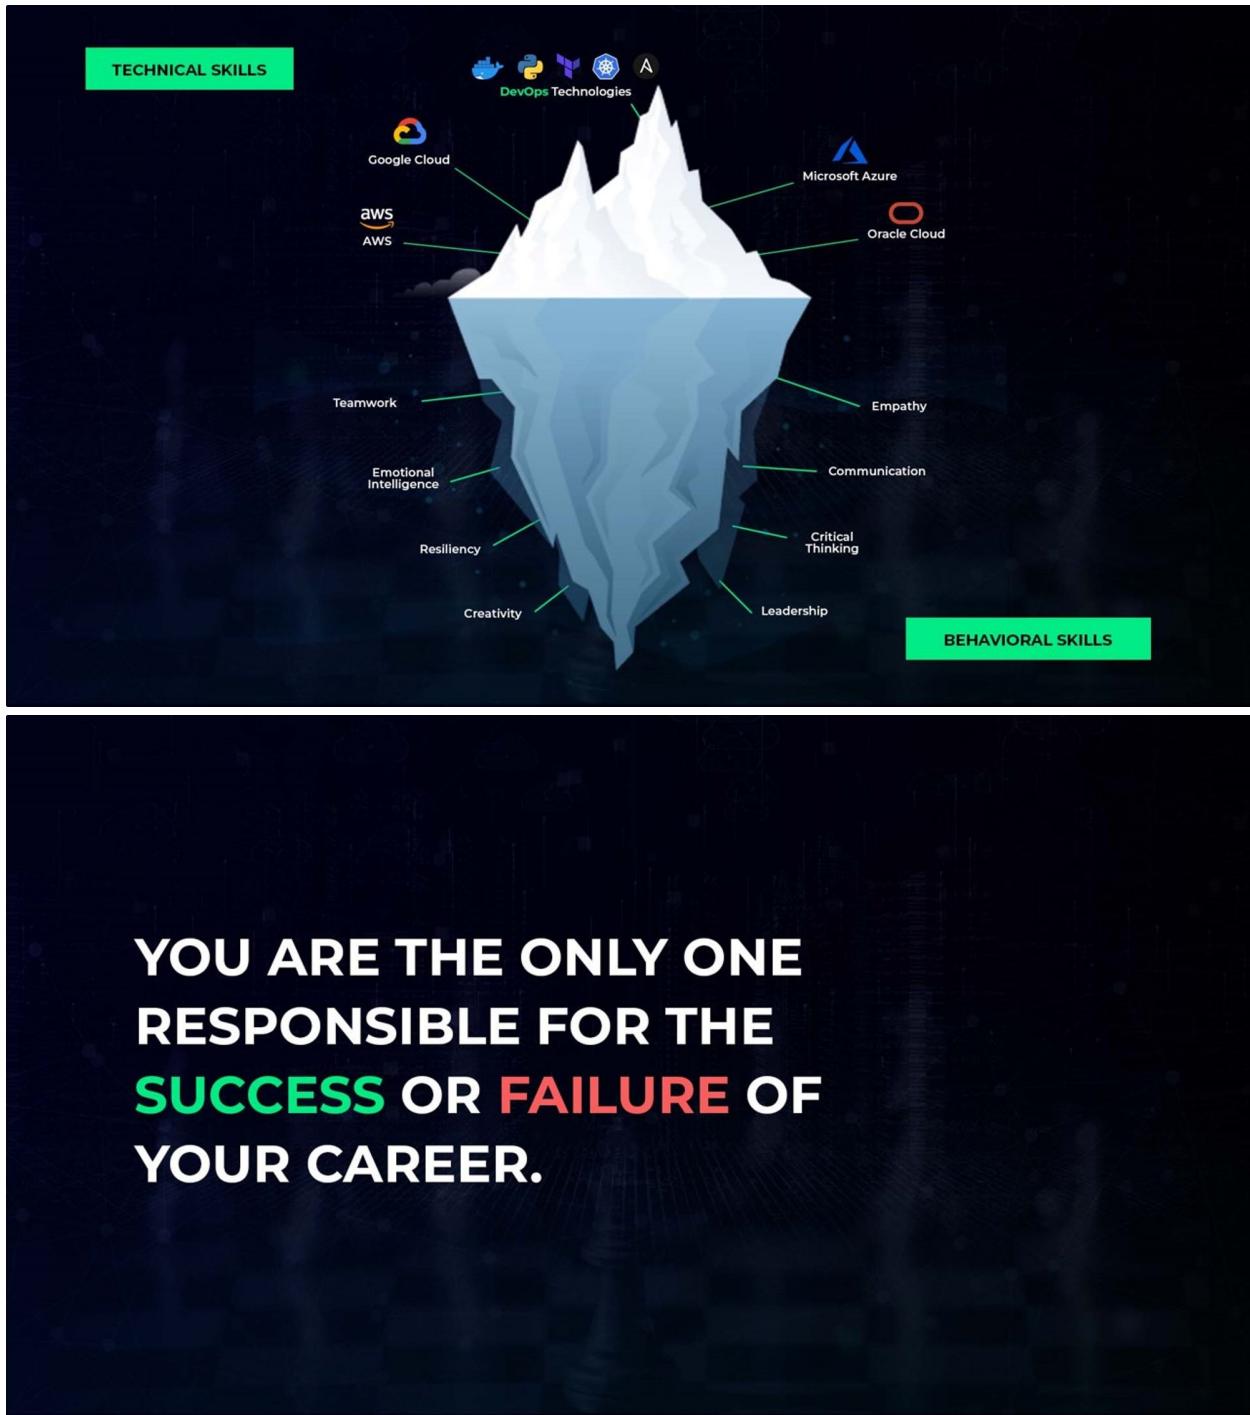

Theory of the Irresistible Professional

The skills you need to develop to be an irresistible Professional in the market

1 *Strategic Market Vision*

2 *Technichal Knowledge, validated, in-depth, and aligned with the market.*

3 *Soft Skills, Networking e Personal Branding.*

**YOU ARE THE ONLY ONE
RESPONSIBLE FOR THE
SUCCESS OR FAILURE OF
YOUR CAREER.**

It is possible, you can do it. I wouldn't say this if I didn't see almost on a daily basis the students of the MultiCloud Bootcamp getting results through the knowledge that they develop at BM. You need to believe.

Take a look at this Success Case

SUCCESS CASES – MULTICLOUD BOOTCAMP

WAGNER MUNHOZ

IT Professional WITHOUT any Cloud experience

RESULT:

After completing the MultiCloud Bootcamp, getting new Cloud Certifications, and applying the Irresistible Professional Theory (IPT) on his career, he got hired by Oracle Corporation for a Sr. Cloud Engineer full-time position.

Tomorrow, it's the big announcement. 🚀

TOMORROW

I will give you the plan that can accelerate the results of your Cloud Computing career.
